

The SODI GT3 was developed to fulfill the needs of rental concession track businesses. It builds on the incomparable level of perfection of the SODI GT2: It offers a combination of durability, drivability, drivers safety, attractiveness. This kart has features that no other kart on the market can match, resulting in an excellent driving and ownership experience.

With its proven plastic protection and added features such as the size-adjusting sliding pedals (patent pending), fuel tank enclosure and fully enclosed tie rods, also found on the revolutionary Highline RX 7.

The SODI GT3 ensures safety for your customers while protecting your go-kart. It is equipped with a durable HONDA 160, 200 or 270cc engine and is ideally suited for either indoor or outdoor tracks approved for this kind of go-kart activity.
